16:50 – 17:00	Q&A and conclusion

The 2024 version of The Essential Toolkit provides a dynamic and unique comprehensive overview of the changing face of cystic fibrosis (CF). This course is intended for medical and health care professionals involved in either adult and paediatric CF care and/or CF research, and provides a great opportunity to meet, learn and discuss the new era of CF with experts in the field. It is also great fun! Participants will leave with principles and new skills to apply in practice.

Pre-course requirements: Basic knowledge on CF pathogenesis and clinical care is preferable, but not essential.
