

European Cystic Fibrosis Society (ECFS) 2023

Vienna, Austria

Thursday 8 June 2023 | 12:30–14:00 CEST | Austria Center, Hall E

Taking the long view: Challenges and opportunities in CF management across the lifetime

This symposium is organised and entirely funded by Vertex Pharmaceuticals (Europe) Limited.

This symposium is for healthcare professionals only, it is not open to patients or members of the public.

Learning objectives

This symposium aims to:

- Describe the potential clinical benefits of early intervention on the disease course in people with CF (pwCF)
- Review clinical cases across different life stages and discuss the latest available evidence and expert guidelines to improve patient outcomes
- Outline approaches to address challenges with treatment adherence across different life stages, including paediatric, adolescent and adult
- Debate and reflect on current and future care needs to continue to improve models of care and achieve greater quality of life for pwCF
