

COVID-19 IN PEOPLE WITH CF IN EUROPE

Data up to 4 March 22

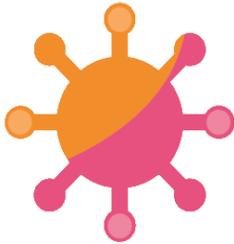

Background

CF patient registries throughout Europe are collecting data about people with CF who become infected with SARS-Cov-2, causing the illness COVID-19.

Here we present a weekly update of centralised, anonymised data from countries who are members of the ECFS Patient Registry (ECFSPR).

These data are preliminary, incomplete, might change over time. Therefore this information should not be used to direct clinical decisions.

Covid-19 in pwCF

2652

**cases documented
(with PCR/antigen confirmation)**

Gender

1285 Male

1367 Female

Status of COVID-19

31 died

2417 recovered

54 unknown

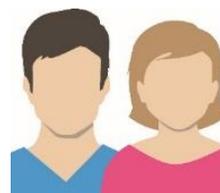

Hospital

393 hospitalised

61 intensive care

Age

1054 <18 years

1494 18-49 years

104 >50 years

Note: sometimes data are missing for measurements, therefore the numbers do not always add up as expected
