

COVID-19 IN PEOPLE WITH CF IN EUROPE

Data up to 9 September 21

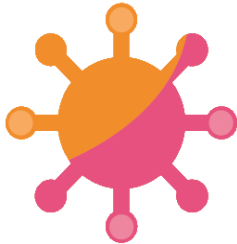

Background

CF patient registries throughout Europe are collecting data about people with CF who become infected with SARS-Cov-2, causing the illness COVID-19.

Here we present a weekly update of centralised, anonymised data from countries who are members of the ECFS Patient Registry (ECFSPR) .

These data are preliminary, incomplete, might change over time. Therefore this information should not be used to direct clinical decisions.

Covid-19 in pwCF

1650

cases reported

1432

cases documented
(with PCR/antigen confirmation)

Gender

695 Male

737 Female

Status of COVID-19 illness

20 died

39 ongoing

1329 recovered

44 unknown

Hospital

286 hospitalised

44 intensive care

Age

490 <18 years

878 18-49 years

64 >50 years

Note: sometimes data are missing for measurements, therefore the numbers do not always add up as expected
