

Postdoctoral position in Brussels – Belgium

The laboratory of Teresinha LEAL is offering a postdoc position in the field of Cystic Fibrosis. The research group uses transgenic mouse models and cell models of CF to study ion transport abnormalities, exaggerated inflammatory responses and preclinical effects of potential basic therapies for CF. It is part of the Louvain centre for Toxicology and Applied Pharmacology (LTAP - <http://www.toxi.ucl.ac.be/>), one research centre of the Institut de Recherche Expérimentale et Clinique (IREC - <https://uclouvain.be/en/research-institutes/irec>) situated on the campus of the Université catholique de Louvain, one of the leading higher educational organisations in Brussels, Belgium (<https://uclouvain.be/en/index.html>).

The position is available for one year (subjected to satisfactory review after 12 months). Applicants should be committed, friendly, enthusiastic and must have strong skills in cellular and molecular biology. Previous experience with animal models, electrophysiology and confocal microscopy is an asset. Applications should be sent by e-mail to Teresinha.leal@uclouvain.be and should include a CV with publication list and a cover letter detailing research motivation. The position will remain open until a suitable candidate is found.
