

Title: Respiratory Physiologist
Grade: Band 6
Job base: Royal Brompton Hospital
Salary: £30,401 - £32,525
Job type: 1 year in the first instance

Advert text:

The Lung Clearance Index Core facility is a research group within the Cystic Fibrosis and Chronic Lung Infection department with Professor Jane Davies. Professor Jane Davies and Clare Saunders have vast experience in paediatric respiratory physiology, providing a global service for the novel lung clearance index test.

A Respiratory Physiologist post has become available within the busy lung clearance index (LCI) core facility; you will become skilled in the multiple breath washout (MBW) measurement, working with adults and children requiring both standard and specialist physiological measurements. You will perform tasks within the LCI core facility, including training and qualification of LCI operators and over reading of LCI traces sent in from a number of European and Worldwide cystic fibrosis centres participating in innovative clinical trials. You will also assist with the coordination of clinical trial activity undertaken by the team working directly with the research and clinical team under the direction of the project manager.

The candidate must have a BSc, BTEC or equivalent qualification in a scientific subject. They should have experience in working with children as well as patients within a healthcare setting. The candidate must also communicate well with others, be adept with computers and have good organisational skills.

The contract is a one year full time, fixed term contract, with potential for extension post this period.

Closing date: 16 APR 2021

[If known] Interview date: 07 MAY 2021 TBC
