Re: nominating prof JC Davie for board member.

Prof. Jane Davies is one of the leading clinical researchers in CF and I am confident that she will be a valuable ECFS board member.

She has devoted her career to the care of patients with CF and has already contributed greatly to the field. She has been a regular member of task forces for guidelines and consensus documents. Especially her knowledge about clinical trial design as a whole and about outcome parameters used in CF clinical trials are very valuable in the current era of CF drug development. In the ECFS-CTN she successfully leads the lab for standardization, certification and central reading of lung clearance index.

Jane Davies has a sharp mind, she is critical and has well balanced views. She can be the leader but she can also be an extremely supportive team member with great team spirit. Her contribution is always much appreciated.

In summary, since Dr Jane Davies is one of the leading clinical researchers in the field of cystic fibrosis, she knows what the field of CF needs today and tomorrow. Therefore I strongly support her nomination for board member.

Sincerely,

Prof. dr. K. De Boeck
